## PRESENTATION OF DISCONTINUED 1969 COMMODITIES IN 1970 EXPORT QUARTERLY REPORTS

Effective January 1, 1970 Forty-three new export commodity classes were implemented. The class code for twenty-two additional former classes were changed and in these cases there was no change in commodity description or coverage. Twelve former classes were discontinued seven of which have no 1970 comparison. The remaining five discontinued classes were retained because the content of these former classes is now included in 2 or more existing classes; the renumbering of these classes will not improve commodity comparison.

Table I shows the 1970 class under which the renumbered (change in code only) 1969 class is presented in the 1970 quarterly export reports together with the former 1969 class code.

Table II lists the 1970 classes under which the 5 discontinued classes are presented together with the former class code.

Table III lists the discontinued classes which retain the same class code; For these commodity classes no totals appear in the 1970 column.

Table IV lists the new 1970 classes for which there are no direct 1969 commodity comparison.

STATISTIQUE SUR LE COMMERCE EXTERIEUR MAINTENANT  
SUR MICROFICHES ET SUR BANDES MAGNETIQUES

La Division du commerce extérieur, Statistique Canada, annonce qu'il est maintenant possible de se procurer sur microfiches de 4" x 6" ou sur bandes magnétiques un certain nombre de ses publications auparavant disponibles sous forme imprimée seulement.

Sur les microfiches, chaque page 8½" x 11" est représentée par une image réduite à 1/25 de son format original. Par conséquent, chaque fiche peut contenir jusqu'à 98 pages imprimées. Par exemple, la publication Exportations par marchandises (n° 65-004) de juillet 1974 (264 pages) peut être remplacée par trois fiches de plastique de 4" x 6". La qualité de l'image est suffisamment bonne pour être utilisée sur un appareil de lecture très simple. On peut également se servir de lecteurs-imprimantes de microfiche si un exemplaire de format ordinaire est nécessaire. Les microfiches sont disponibles trois ou quatre semaines avant la version imprimée de la publication correspondante.

On peut également obtenir les renseignements contenus dans les publications mensuelles Importation par marchandises (n° 65-007) et Exportations par marchandises (n° 65-004) sur bandes magnétiques. Créées mensuellement, les bandes contiennent, en plus des données du dernier mois, les données révisées de tous les mois précédents de la même année, l'ensemble étant ventilé à la fois par marchandise et par pays. Des bandes contenant des statistiques révisées sur les années antérieures sont également disponibles. Les données sont copiées sur une bande à 9 pistes, 1600 octets par pouce (BPI) employant le code EBCDIC, à structure impaire. Des renseignements plus détaillés concernant la structure d'enregistrement seront fournis au moment de la demande initiale. Les bandes mensuelles seront également disponibles avant les volumes imprimés.

On peut bénéficier de ces services sur une base contractuelle, pour une période minimum d'un an dans le cas des publications mensuelles et trimestrielles. Les utilisateurs intéressés devraient retourner à la Division du commerce extérieur la formule annexée, indiquant les services qu'ils désirent acheter. Un contrat qu'ils devront signer leur sera envoyé peu de temps après réception de cette formule.

EXTERNAL TRADE STATISTICS NOW AVAILABLE ON  
MICROFICHE CARDS AND MAGNETIC TAPES

The External Trade Division, Statistics Canada, announces that a number of its publications previously available in printed form only can now be purchased in the form of either 4" x 6" microfiche cards or magnetic computer tapes.

On the microfiche cards, each 8½" x 11" printed page is represented by an image which is 1/25 of the original size. Thus as many as 98 printed pages are contained on each card. For example, the report Exports by Commodities (65-004) for July, 1974 (264 pages) can be replaced by three 4" x 6" plastic cards. The quality of the images is good enough for use on very simple microfiche reading equipment. Microfiche reader-printers may of course be employed if full-sized hard copy is required. Microfiche cards will be available three to four weeks before the printed version of the corresponding report.

The information contained in the monthly bulletins Imports by Commodities (65-007) and Exports by Commodities (65-004) is also available on computer tapes. Each monthly tape contains, in addition to the latest month's data, revised data for all previous months of the same year at the level of commodity by country. Tapes containing monthly data for previous years (incorporating any revisions) may be purchased at any time. The data will be copied onto an industry compatible 9 track 160 bytes per inch (BPI) tape using the Extended Binary Coded Decimal Interchange Code (EBCDIC), odd parity format. Additional record format information will be provided at the time of initial request. Monthly tapes will also be available earlier than the printed volumes.

These new services must be obtained on a contract basis, for a minimum period of one year in the case of monthly and quarterly reports. Interested users should therefore return the form below to the External Trade Division, indicating the services to be purchased. A contract will be forwarded for signature shortly after receipt of this form.

## EXPLANATORY NOTES

1. **Source of Data:** Export documents collected by Customs are the basic source of export statistics, except for data on electricity and on crude petroleum exported by pipeline. Electricity exports are reported by the exporting firms through the National Energy Board, and oil exported by pipeline is reported by the pipeline companies directly to the Dominion Bureau of Statistics.
2. **Time Periods:** Export statistics for any period include all goods declared on export entries received at DBS during the calendar period. There are often delays in the collection or mailing of Customs export documents, especially those relating to waterborne shipments. Reports of pipeline exports of crude petroleum and natural gas only arrive in time for inclusion in statistics for the month following the month of actual export.
3. **Coverage:**
  - a. **Domestic Exports:** Statistics of domestic exports include both goods which are wholly produced in Canada and goods previously included in import statistics which have been changed in form by further processing in Canada and then exported.
  - b. **Exclusions:** The following commodity movements are excluded from export statistics: gold and gold products where the value of the gold content is 80% or more of the total value except for dental gold alloy (class 880-29) and a small amount of gold scrap in the form of jewellers' sweepings (class 256-99); current coin; settlers' effects; private donations and gifts; tourist purchases; goods shipped to Canadian armed forces or diplomats abroad or re-exported from Canada by forces of our NATO allies or by foreign diplomats; temporary exports for exhibition or competition (and film exported for exhibition or processing, or returned after exhibition or processing in Canada); exports to Canada's NATO allies financed under the Defence Appropriation Act; bunker supplies and ships' stores sold to foreign vessels or aircraft in Canadian ports; generally, all temporary exports and goods merely moving in transit through Canadian territory.
4. **Countries Credited:** Exports are credited to the country to which they are consigned at the time that the goods leave Canada, i.e. to the furthest known destination of the goods.
5. **Quantities:** Table 2 shows quantities in terms of the units specified for each class in the Export Commodity Classification, Vol. I (DBS Catalogue No. 12-521). Where no unit of quantity is specified, the quantity columns are empty.

Units of weight or volume relate to the weight or volume of the goods, and exclude the weight or volume of any packing required for shipment. Numbers refer to complete (or substantially complete) units exported, excluding parts (for any class where the recorded value includes both complete units and parts of these units, the average value per complete unit can not be calculated). All units of quantity used in this report are defined on page 5.
6. **Values:** Export entries define the value of exports as the "actual amount received or to be received in terms of Canadian dollars, exclusive of all charges" (freight, insurance, handling, etc.). This definition would give values f.o.b. point of consignment for export, but in practice it is not always followed. For example, in recent years a significant but indeterminate proportion of exports has been reported in United States dollars.
7. **Abbreviations:** Many descriptions of countries and commodities used in this report are abbreviated or incomplete. Full descriptions of all commodities appear in the Export Commodity Classification, Vol. 1. The letters "n.e.s." mean "not elsewhere specified".
8. **Revisions:** All statistics in this report are subject to revision. Revisions to previous reports are published on coloured pages at the beginning of each quarterly report.
9. **Country Classification:** Statistics are compiled and presented on a geographical basis and the use of state or territorial titles carries no political, territorial or constitutional implications.
